

# The Private Credit ADVANTAGE

## The Private Credit Advantage

The Private Credit Advantage was developed in partnership with a group of leading institutional asset managers, broker-dealers, private credit investors and insurance companies seeking to outsource data aggregation, standardization, analytics and pricing across thousands of private credit

securities. Subscribers have access to pricing from over 830 independent sources, analytics, workflow tools and more in an extremely intuitive, web-based platform.

What used to take investors, lenders, arrangers, analysts, originators, marketing professionals and investor relations professionals days to complete, can now be done in a matter of seconds with the Private Credit Advantage.

## Features

- ✓ **Pricing**  
Pricing from over 830+ independent sources. Access intraday prices as well as end-of-day composite prices.
- ✓ **Analytics**  
Yields and spreads (to any benchmark) and many other calculations.
- ✓ **Holdings**  
Search buy-side firms for their current and historical holdings by sector, portfolio, issuer, country, region and currency.
- ✓ **Reference Data**  
Descriptive data fields such as terms, ratings, and more.
- ✓ **Advanced Search**  
Use Advanced Search as a business intelligence tool. Retrieve pricing by entering any issuer, identifier or ticker. Search through all bonds, loans and equities for up to 20 years of historical pricing and analytics.
- ✓ **Charting**  
Chart and overlay any combination of bonds, loans, and indices. Create, customize with colleagues, and export any chart.
- ✓ **Portfolio**  
Build custom portfolios with current and historical pricing and analytics. Collaborate with team members by sharing portfolios.
- ✓ **Comps**  
Create comp. sheets with one click; search through many different descriptive, market-related and financial criteria.
- ✓ **Financials**  
Access up to date Cash Flow, Income Statement and Balance Sheet.
- ✓ **Research**  
Access sell-side research from over 200 Wall Street and independent research firms (available to buy-side users) and in-house daily market summaries going back to 2004.
